

Internship proposal for Master students

Traffic Light Recognition by image processing

The objective of this internship is to research, develop and evaluate image processing algorithm to classify traffic lights in onboard vehicle vision-system. Thematic: semi-supervised/un-supervised learning, Deep Learning.

Profile: Master

Competences: C/C++, Image processing, Matlab and/or Python

Internship duration: 5 to 6 month starting from February/March 2017

Location: Continental Automotive France, 1 avenue Paul Ourliac 31036 Toulouse cedex, France

Contacts:
